C++ Language	MATLAB Language

AWARDS

2nd place in VTEX track of
Brazilian Hackathon
BRASA Hacks

April
2021

From a total of **51 teams**, my group won **second place**. We built an omnichannel integration to **VTEX's** platform, which was an online bot with personalized messages, smart search, and checkout.

Ambassador Award for
Excellent Encouragement
International Astronomy and
Astrophysics Competition

July
2020

EDUCATION

Oberlin College (September 2020 - May 2024)
Bachelor's Degree Computer Science & Physics (Astrophysics) 3.9 / 4.0

CODING EXPERIENCES

Star View (June 2021 - Present)
<https://starview.one>

This is a software that informs users the best location, date, and time to **stargaze**, in which I have:

- Made the software **modern** and **responsive** by designing a new visual for **Android, IOS, and Web** versions.
- Increased **platform distribution** by recreating old version (made with Java) with **React Native** and **Expo**.

Cinephix (January 2021 - Present)
<https://cinephix.com/>

This is a place where people passionate about movies and TV shows (**cinephiles**) can pursue their interest, in which I have:

- Built an **API** with **Node.js** and **MongoDB** that collects data from **TMDb's** API, caches information with **Redis**, and more.
- Developed and designed the entire **Progressive Web Application** using **React.js** and **Next.js**.

Cruz Representações (August 2020 - August 2021)
<https://cruzrepresentacoes.com.br/>

This is a local sales representation company, which has approximately **1,500 clients**, in which I have:

- Reduced costs** of the company by developing a **Server**, an **E-Commerce**, and an **Administer System** specific to the company.
- Implemented features like automatic **e-mails**, **PDF** generation, **spreadsheet** for large data, **authentication** with roles, etc..
- Developed **PWAs** with **offline** support using web development technologies like **Next.js**, **React.js**, and **IndexedDB**.

STEM Guy (November 2020 - March 2021)
<https://stemguy.club/>

This is a blog where you can read articles about **science** and **technology**, in which I have:

- Built an **API** with **Node.js** and **MongoDB**, and the front-end apps (blog and **Administer System**) with **React.js** and **Next.js**.

Text Counter
<https://textcounter.iago-mendes.me/>

This is an application that counts text, which was my **first** project in **production**.

LEADERSHIP & VOLUNTEER & WORK EXPERIENCES

Oberlin College (October 2021 - Present)
Student Grader for the Mathematics Department

I grade homework problem sets for the Multivariable Calculus course.

Oberlin College (September 2021 - Present)
Resident Assistant for the Office of Residential Education Housing

In this **leadership** position, I assist residents in developing a positive **learning community** environment.

Astronomical Olympic League (June 2019 - Present)
Content Director

Being **responsible** for the Content Team, I **delegate tasks**, create **reports**, participate in content production. We create free materials for students to study Astronomy, such as online events, classes, exercises, solutions, articles, etc..
